Tips for using this product

You will need to have at least one dice for this activity. The worksheets include 3 levels of questions. They do not necessarily correspond with grade levels, but they are in order of difficulty. You can decide which questions will fit your students' listening skills best.

Last year, I did this as a classroom listening activity projected on the board. It was great for the last few minutes at the end of class, especially after a listening lesson. This year I am going to try it as a center - with students in small groups of 2-3. I hope they will feel comfortable enough to discuss their answers with each other.

After a listening lesson, simply have students roll a dice and answer the question to which it corresponds. Then pass the dice to another student and roll again! If a question is picked twice - that's OK - after all, we all hear music differently. All opinions are welcomed, as long as you provide support!

Change it up by having students roll for each other or work with a partner to come up with an answer.
